

83 QUEENS ROAD MELBOURNE VIC

A 19-storey residential tower of 161 apartments was designed to maximise the strength of the location on Queens Road overlooking Albert Park Lake.

The tower is highly sculptural in form, with a graceful curving, glazed façade that ensures sweeping views of parkland, Port Phillip Bay and the city. An historic Victorian mansion on the site has been retained, restored and integrated into the development, giving the project great individuality and character.

The project is currently under construction and is scheduled for completion in 2005.
