

# TECHNOLOGY + ENTERPRISE CENTRE

LAKE JOONDALUP  
BAPTIST COLLEGE

**A two level building with a total floor area of 2400m<sup>2</sup>, this project delivered exceptional value for the College whilst maintaining an architecture of some distinction.**

The exterior forms of materials have been chosen to both complement and extend the existing materials palette. Limestone coloured block work has been used exclusively through the existing school campus with low pitched colorbond roofing. Working closely with the school, The Buchan Group introduced more colour, higher roof pitches, and more articulated spaces to allow for the creation of a more stimulating learning environment.

The internal finishes and detailing were chosen to complement the industrial nature of the building yet create a mature and sophisticated learning environment. With the high traffic movement and nature of young students, it was important that all areas be durable and utilitarian yet responsive to the requirement that the spaces be light, airy and conducive to learning. AWARDS: Commendation - Public/Institutional Category, 2003 RAIA (WA Chapter) Awards. CLIENT: Lake Joondalup Baptist College COMPLETED: August 2002 VALUE: 3.2M
